

))) Sound Therapy News 2010

Introducing our new

Sound Therapy

Ultra Light[®]

New Music,
New Player

Yes, Sound Therapy is now available on the newest, lightest, most portable and convenient technology available. This is the biggest advance in Sound Therapy deliverability and convenience since 1984 when it first went portable.

Several years of researching new technologies have now resulted in our own specifically engineered playback device which meets the specific requirements of Sound Therapy including high fidelity playback, extensive storage capacity, comfort, convenience and ease of use. The player is built into the headset and comes pre-loaded with your Sound Therapy music program. The clever design with flexible wire band and soft ear plugs means the player fits any head size and is extremely comfortable.

))) **Sound Therapy** INTERNATIONAL

Revolutionary headset player

The great advantages of this new delivery method are:

- ✓ **High quality sound**, remastered to provide better quality than our previous tape or CD programs.
- ✓ **No wires!** No getting tangled up in your bag or getting caught on things.
- ✓ Extremely **light weight** so it's just like wearing a light weight headphone.
No need to change discs, tapes or batteries. Just plug in to recharge on mains power.
- ✓ **Simple and easy to use**. No confusing menus or complex controls. Just 3 buttons make the operation very straightforward.
- ✓ So **compact** the whole system fits in your handbag or pocket.
- ✓ **Comfortable** and adjustable for any head size.
- ✓ **New music**. With this new release we have fully revised and remastered our program using new music, **never released for Sound Therapy before**.

"I have used Sound Therapy for 25 years and never before found it so comfortable and convenient!"

Rafaele Joudry

Q. Can you sleep with the Ultra Light?

A. Thought it is not as flat as some headphones the Ultra Light is fine for sleeping on your back. Because the actual ear plug is made of soft rubber it is also possible to lie on your side if you have a soft pillow

Q. The buttons must be very tiny it hard to work?

A. There are only 2 buttons and they are easy to work without looking once you know how. It comes with easy to follow instructions.

Q. Ear buds bother me, so how do I know this will fit?

A. The Ultra Light comes with 3 different sized ear plug fittings in ultrasoft latex. It fits any sized ear. The flexible material of the connecting headband has the right degree of softness and springiness so it is extremely comfortable for almost anyone.

Q. Will it fall out?

A. No, you can even jog with it. It fits securely on any head, as long as you have ears. (Ah Gough may have had a problem!)

Q. Is it an MP3?

A. No, this is different to your standard MP3 player which delivers a low quality digital format that would not be suitable for Sound Therapy

Q. Is it an I-pod ?

A. No, I-pod is an Apple brand product, sometimes used as a generic term. This is a new light-weight super portable technology

which provides top quality high fidelity sound - the Sound Therapy Ultra Light. The player is inside the headset, making this a completely new revolution in sound technology

Q. This player looks smaller than an I-pod or MP3 player so how come we were told not to download our CDs onto our MP3 player?

A. It's all about sound quality. This unique player is one of the first to have sufficient storage and the right technology for high quality playback to support the type of high frequency rich sound files needed for Sound Therapy

Q. Can I get one of these and load my own CDs onto it or download these files to my computer?

A. No. The Sound Therapy Ultra Light comes pre-loaded and the files are protected to prevent accidental alteration or loss by customers.

Q. Can I store my other music files on my Ultra Light?

A. No, your Ultra Light is specifically made for Sound Therapy and is not intended for playing the music. It cannot be accessed using standard music loading programs.

Q. I have a player that looks just like the Ultra Light, so can I use that for Sound Therapy?

A. No. Other players may have a similar external design, but the internal mechanism has been specially engineered for Sound Therapy's special requirements.

Use it even on the phone!

Why Choose the Ultra Light?

If you have used Sound Therapy previously with a tape or CD player, here are the advantages of choosing the Ultra Light for your next Sound Therapy program.

- ✓ Lighter and more convenient
- ✓ The price is the same, if you include the equipment cost
- ✓ Less to carry with you when you travel
- ✓ It looks so cool!
- ✓ Get one for each family member and they'll love it.
- ✓ Simple to recharge, no batteries to change
- ✓ Easy to take one ear phone out when talking on phone
- ✓ No annoying wires

Note: The Ultra Light is not suitable for wearing under ear protectors.

All New Music

This new technology is being launched with the release of a new program of music called the Sound Therapy Listening Foundation Program. Whether you are a brand new listener or an advanced listener, this all new music on this high fidelity format will be a perfect start or a valuable addition to your listening program.
